**Powerline Broadband Connector**

The Powerline Broadband Connector allows the receiver to connect to a broadband service through the power cord and the electrical wiring in your home.

We encourage you to always connect your receiver to broadband in order to:

[Keep critical receiver data current](#)  
[Access thousands of online titles](#)  
[Order PPV using your remote control](#)

**\$30.00** Includes standard shipping (continental US only).

[Add To Cart](#)

**Warranty / Return Information**

Includes a one (1) year warranty from the date of purchase.  
Item is non refundable once your order has been placed.

**How It Works**

The Powerline Broadband Connector allows you to connect your internet in one room to your ViP receivers in different rooms. Install the unit in the room where your internet modem or router is located and your ViP receivers will use their own power cords to connect to the internet over your home's power lines.

**Features**

Built-in surge protection for units. Do not plug units into a surge protected power strips.  
Compatible with HomePlug technology.

**Compatibility**

Receiver Models: 211, 211k, 222, 222k, 612, 622, 722, 722k, and 922.  
Requires a high speed internet service  
Device must be directly connected into electrical outlet or HomePlug certified power strip.

**Package Contents**

1 Powerline Broadband Connector Unit  
 1 10-foot Internet Cable: a 10 ft. internet (Ethernet Cable) is provided to connect the unit to your modem or router.  
 Installation Manual
